

## UV Disinfection Box for Tablets and Phones Coronavirus - 120v - (3) UVC Fluorescent Lamps - Automatic Timer

Thank you for your purchase of the Larson Electronics IND-TBL-BX-R2 Series UV Disinfection Box.

### **WARNING:**

**READ CAREFULLY BEFORE INSTALLING FIXTURE. RETAIN THESE INSTRUCTIONS FOR FUTURE REFERENCE.**

#### **CRITICAL SAFETY INSTRUCTIONS:**

- INSTALLATION SHOULD ONLY BE CONDUCTED BY A QUALIFIED ELECTRICIAN IN ACCORDANCE WITH NEC AND ANY RELEVANT LOCAL BUILDING CODES.
- RISK OF FIRE OR ELECTRIC SHOCK. FIXTURE INSTALLATION REQUIRES KNOWLEDGE OF LUMINAIRES ELECTRICAL SYSTEMS. IF NOT QUALIFIED, CONTACT A QUALIFIED ELECTRICIAN.
- BE CERTAIN ELECTRICAL POWER IS OFF BEFORE AND DURING INSTALLATION AND MAINTENANCE.
- MAKE SURE THE SUPPLY VOLTAGE IS THE SAME AS THE RATED LUMINAIRE FIXTURES VOLTAGE.
- TO PREVENT WIRING DAMAGE OR ABRASION, DO NOT EXPOSE WIRING TO EDGES OF SHEET METAL OR SHARP OBJECTS. SUITABLE FOR DAMP LOCATIONS.
- **WARNING: ULTRAVIOLET LIGHT IS HARMFUL** TO EYES AND SKIN. DO NOT STARE DIRECTLY INTO THE ULTRAVIOLET BEAM WITHOUT WEARING PROTECTIVE GEAR TO PROTECT EYES FROM LONG TERM DAMAGE. UNPLUG LAMP BEFORE SERVICING.

The Larson Electronics IND-TBL-BX-R2 Series is a Medical Grade Rapid Anti-viral/anti-bacterial Decontamination Box which can disinfect coronavirus and bacteria found on tools, medical equipment and work devices. With access to 32.5-watt UV lamps, this unit offers UV-C output at a range of 200nm - 280nm (253.7nm). The 304 stainless steel disinfection box comes with a timer, external indicator light and an automatic shut off safety feature.

### **Power**

The IND-TBL-BX-R2 Series UV Decontamination Box is configured to operate on 120V @ 60Hz AC power. Be sure supply voltage to the box is correct to prevent damage to the fixture.

### **Mounting**

The IND-TBL-BX-R2 Series UV Decontamination Box is designed with a flat base for stand alone operation on flat surfaces, such as a desk or a table. Place the box in a location it is unlikely to be disturbed or knocked off the table during use to prevent damage.

### **Operation**

To disinfect your device or equipment, simply open the box, place the device to be disinfected inside, close the box, and power on your IND-TBL-BX-R2 Series Decontamination Box. Set the timer to ensure the desired duration of disinfection takes place. The timer can be set for any duration from 1-30 minutes. An external indicator light notifies the user when the box is on and sanitation is ongoing. An automatic shut off safety feature cuts power to the system should the door be opened before sanitation is complete. The box is made of 304 stainless steel for durability and to ensure the UV light inside is reflected to the device being disinfected. The UV light can disinfect over 99% of bacteria, viruses, coronavirus, mold and spores. This device is recommended for disinfecting compact tools and equipment on tables, desks, work stations and surfaces. Individuals may leave their electronics and personal devices (such as keys, cell phones, laptops, etc.) inside the box. The system can also be used to disinfect medical equipment, including masks, face shields, gloves ventilators, hoses and more. After exposure, the devices can be used again immediately.

### **USE AND CARE**

Unauthorized modification may impair the function and/or safety of this device and could affect the life of the equipment. Always check for damaged or worn out parts before using the device. Store it in a secure place out of the reach of children when not in use. Inspect for good working condition prior to storage and before re-use.
